Flower Field

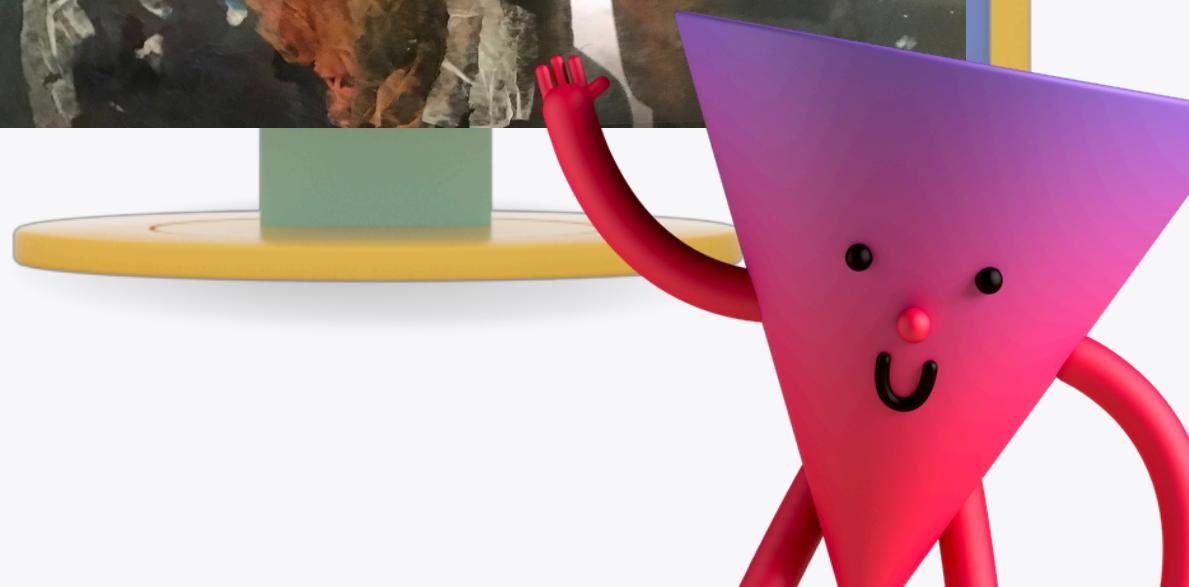

Info

I made this painting during my year 7 oil painting class. It took a 2–3 months to completely finish it, and its roughly the size of an A3 paper. Its inspired by the yellow flower fields during the spring in germany, accompanied by the lush, green rolling hills. These flowers are canola flowers.

Jupiter

This painting is a collage of paper and gift wrap that I made as a class project during year 6. I used chalk and pastels to achieve the dark orange and blues, and paint to achieve the dark background. I also used a toothbrush dipped in white paint to achieve the splatters of paint across the canvas.

ceramic pieces

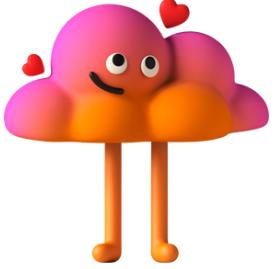

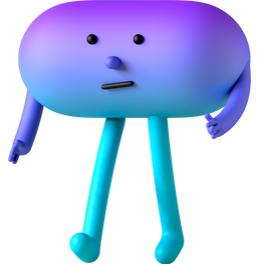

both these ceramic pieces where made during my year 7 art class, when we were in the ceramic room.

I decided to focus on natural elements, and decided to sculpt 2 seedpods inspired by the work of Sarah Rayner. These pieces each took one month and a half, and required careful artistry to produce.

Ceramic hybrid fox

This creature is a mix between a fox, an eagle, and a fish. It took three months to make, and it was made out of porcelain clay.

I used special paint to achieve the shiny, glazed look. However, some of the white spots on the wings were meant to be pink, but the glaze didn't fire in the kiln for long enough. It was really fun to make!
